

Personal Summary

Application developer with 3 years of experience developing and maintaining enterprise ERP modules using C#, ASP.NET Core, Ext JS, and SQL Server. Hands-on backend experience in API development, data optimization, and performance tuning, complemented by frontend experience building reusable UI components. Background in malware analysis adds problem-solving skills and system-level thinking.

Skills

- **Programming Languages & Frameworks:** C#, ASP.NET Core, JavaScript (ES6+), SQL, Entity Framework Core
- **Frontend Tools:** Ext JS (Sencha), Sencha Architect, Responsive UI Development
- **Backend & API Development:** ASP.NET Core Web API, RESTful Services, Middleware, Authentication
- **Database Technologies:** SQL Server Management Studio (SSMS), T-SQL, Liquibase (Schema Versioning), SQL Server Data Tools (SSDT - previously used)
- **Tools & Platforms:** Azure DevOps (Git, Pipelines), JIRA (Agile Task Management), Visual Studio, VS Code, Git
- **Cybersecurity & Analysis (Previous Experience):** Malware analysis (Static/Dynamic), Reverse Engineering (IDA Pro, OllyDbg), Threat Detection, PE file analysis

Objectives

To advance into a **Mid-Level Developer position** where I can apply my expertise in C#, ASP.NET Core, SQL Server, and front-end development to build scalable, maintainable enterprise systems—while continuously improving my skills and contributing to a collaborative engineering team

Educational Attainment

College Graduate

Quezon City University

Bachelor of Science in Information
Technology

2014-2022

Work Experience

iRely-Philippines, Inc

Junior Application Developer

June 2023 - May 2026

- Developed and maintained enterprise modules using **ASP.NET Core Web API** and **Ext JS**.
- Built responsive UI components with **Sencha Architect** and integrated them with backend services.
- Developed enterprise modules using ASP.NET Core Web API and Ext JS within an existing RESTful framework.
- **Optimized SQL Server views** and **refactored backend logic** to enhance performance and maintainability.
- Managed schema changes using **Liquibase** for reliable database versioning.
- Used **Azure DevOps** for source control and CI/CD pipelines; tracked progress in **JIRA** within Agile sprints.

Trend Micro Inc. — Philippines

Core Tech Engineer Trainee

2022 – 2023

- Conducted malware reverse engineering using **IDA Pro** and **OllyDbg** on Windows systems.
- Performed static and dynamic malware analysis and categorized threats.
- Verified and analyzed suspicious files, emails, URLs, and IP addresses.
- Investigated malicious scripts and identified established network connections
